

Technical Training- Health and Safety Courses

- HSE foundations.
- Safety awareness and work control.
- Hazard awareness.
- Hazard awareness in industrial cleaning.
- Safety signs.
- Chemical awareness.
- Electrical awareness.
- Advance electrical safety.
- Working at height awareness.
- SCBA (Self Contained Breathing Apparatus).
- PPE (Personal protective equipments).
- Confined space entry.
- Authorized gas tester for hot work.
- Authorized gas tester for confined space.
- H2S awareness principles.
- Advance H2S safety course.
- Risk assessment.
- Accident / Incident investigation.
- Basic first Aid.
- Permit to work.
- Basic fire fighting.
- Advance fire fighting program.
- IMIST (E-learning) (International minimum industry safety training).
- Manual handling awareness.

- Safety lifting awareness.
- Tools and equipments safety awareness.
- Emergency response plan.
- Root cause analysis.
- Radiation awareness.
- Water pollution awareness.
- Air pollution awareness.
- LSA – NORM Scale.
- Pressure hazard safety.

Technical Training- Workshop Technician Training Programs

- General information and working theory for vehicles.
- HSE specific courses for workshop technicians and workshop housekeeping.
- Inspection and diagnostic of vehicle faults.
- How to repair? (First, second and third line maintenance shop).
- Preventive maintenance procedure.
- Corrective maintenance procedure.
- Workshop infrastructure, tools and equipments management plan.
- Workshop materials handling.
- Workshop management and inventory plan.
- Workshop and maintenance production optimization.

Technical Training- Transportation/Fleet Management Training Programs

- Transportation fleet management.
- Vehicle route planning system.
- Driver training program
- Driver improvement course

- Defensive drive course.
- Aggressive driving.
- Driving safety and driving hazards.
- General behavior and personal attitude.
- Traffic signs.
- Root cause analysis.
- Accident/Incident investigation in transportation.
- Risk assessment.
- Emergency response plan.
- Maintenance management plan.
- Inventory management plan.
- Transportation security inspector.
- Vehicle security inspection.
- Logistic operations management.
- Loading capacities and techniques.
- Workplace violence

Technical Training – Construction and Lifting Services

- Scaffolding training for oil and gas industry.
- Sandblasting awareness and work control.
- Cement test and analysis methods.
- Welding (theoretical, simulator and practical training).
- Slings and lifting.
- Signaller/Banks man.
- Crane operator.
- Forklift driving and lifting techniques.

- Safe work procedure.
- Construction safety awareness.

Special Oil and Gas Industry Related Training Programs

- Iraq Oil and Gas Industry – Current Status.
- Production decline analysis.
- Well production and well production optimization.
- Basic knowledge of valves.
- DCS/ESD
- Metering
- Fuel handling and general safety knowledge.
- Crude oil processing.
- Mechanical rotating and static equipments.
- Electrical technicians.

Note: Al Delma can provide Special HSE courses upon clients' request.
